January 14, 2010.

Dear Quick Tub,

It's not very often I find myself compelled to write a company a testimonial.

My wife and I have found ourselves a part of the "sandwich generation" and we need all the help we can get. Raising a young family as well as taking care of an aging mother can create challenges both in our time and financial resources. I was made aware of the walk through product for bathtubs a few years ago and had one installed for my mother. It was the perfect product for her as she was having increasing difficulty getting in and out of the bathtub. Since she was living alone some distance away, at her home by the lake, I was always concerned for her safety when showering as it is so easy to slip and fall, especially for elderly people.

The only drawback was that she could no longer take a bath nor could my kids when they visited her. I was very happy to find out that someone had created a door that could be used with this walk through. It's so easy to use and Quick Tub's removable door has given my mother and my kids the ability to once again enjoy taking a bath any time they feel like it. We like the fact that the door can be stored out of the way when it is not being used. My mother loves this handy feature most of all as she takes showers the majority of the time,

These two products combine the extra measure of bathroom safety for my mother while still allowing anyone to enjoy a nice hot bath. These products represent the most affordable solution offered anywhere, and the installation took only a few hours.

I would not hesitate to recommend the Quick Tub Step in Bath and Shower Conversion System to anyone. In fact as a Certified Financial Planner and business owner I have taken the initiative to recommend these great products to assist many of my clients that are experiencing similar challenges, and my clients that simply wish to stay in their homes longer into their retirement years.

Thanks Quick Tub!

Mark Locke, CFP
